

3rd Grade Update

May 14th-18th

2012

Arts in the Classroom
from last week:

~Last week in connection with the school wide rosary praying we are doing each day, my mom and dad came to share about the rosary with 3rd and 4th grade. They answered a lot of questions and shared some great information none of us knew. 3rd & 4th grade also made "mini rosaries" to use at school or home. ~The students know more about "King Henry Died Unexpectedly Drinking Chocolate Milk" than they even wanted to. Welcome to the metric system! It really is easier!!!

Language Arts

Spelling: Syllables with over lapping patterns

vccv or vccvcv

THURSDAY: NO AP or DLP Test

This normal AP/DLP time will be used for classmates to draw names anonymously to create an end of the year award to be given next week.

FRIDAY: Coding Test

ENGLISH: We will be working on interjections, and we will be doing skits with partners to show our understanding. **These skits will be counted as a test grade for interjections.**

Reading/Social Studies

We are going to use the time we usually have for just reading in conjunction with science so we have an opportunity for more learning in science this week.

I would like to finish our chapter on Observing Weather. We will be taking a few daily grades throughout the week with various in-class assignments.

Unit D Chapter 2: Observing Weather

As the year comes to an end, please consider giving me any advice on how to make next year better by sharing things you wish I had done or things you wish I had done differently. I value your comments and have found that by asking this question each year, I have become a better teacher from the advice from the parents of students I have taught! You may hand write suggestions or email.

Religion

WEDNESDAY: Chapter 25 TEST

(study guide came home Monday)

Thursday: Liturgy at 8:30

PLEASE, PLEASE, PLEASE

As the year comes to an end, please clear up any business you have from the office and any library books or fines that need to be taken care of concerning the library.

I will not know about book fines for my classroom until the beginning of next week.

Math

Chapter 14: Metric Measurement

TUESDAY: Quick Check Test Chapter 14 Lessons 1, 2, 3, 5 and notes in folder

MUST know "King Henry Died Unexpectedly Drinking Chocolate Milk"

They have done really well with the metric concept.

A very helpful skill is to have a visual concept to help think in terms of milli, centi, deci, etc. This is in their folder.

Thursday & Friday & Next Monday & Tuesday: Chapter 18 Fractions

A bit of NEWS from Mrs. Allgood:

1. THANK YOU...for making Teacher Appreciation Week so special. I felt appreciated and loved. Thank you!
2. PIZZA PARTY...WEDNESDAY, May 23rd will be our Pizza Party from Mrs. Ferraez. If your child does not like pizza, please feel free to send a lunch! Since this coincides with the end of school, we will also call it our End of the Year Party! I will have Scott email those who signed up for "End of the Year" to do drinks, desserts, & paper products. Everyone is busy; so, we will keep it simple.
